MEMORANDUM FOR: Lieutenant General James A. Williams, USA
Director, Defense Intelligence Agency

SUBJECT: Intelligence Community Long-Range Planning [] 25X1

Jim -

1. As you may know from your conversations with [] the Planning and Policy Staff of the Intelligence Community Staff is currently developing a new long-range strategic planning process for the Community under [] leadership. As a part of this effort, we have a study under way to identify selected technologies which will be critical to the performance of the Intelligence Community in the mid-1990s. To provide guidance and direction to this project, we have established an ad-hoc committee Technology Steering Panel chaired by [] DIA/DT (see attachment). The panel members are the chairmen of the DCI substantive committees, EIC, JAEIC, STIC, TTIC, and WSSIC, and a CIA/DDI political analysis representative. The objective of the panel is to formulate long-term information needs of the Intelligence Community that can be successfully addressed by technological systems and the research and development associated with them. The ultimate study objective is to provide to the DCI a long-term technology investment strategy for the Intelligence Community. [] 25X1

2. As part of the process, we are asking senior members of the Intelligence Community to address the TSP. Thus far, we have heard from Evan Hineman (CIA/DDS&T), John Stein (CIA/DDO), and we are tentatively scheduled to meet with [] (NSA/DDO) the latter part of April. I would like to invite you to address the group at your convenience. The atmosphere is strictly informal, and we would like your views of the future issues/problems that will confront the Intelligence Community in the mid-1990s and DIA's plans for dealing with these problems. In an attempt to provide some focus to the discussion, we would profit from DIA's views on any or all of the following: 25X1

[] 25X1
[] 25X1
SECRET

- Personal perspectives on the key objectives of the DIA over the 1985-1995 time period in the context of the information needs of that period, and how they will be achieved.
- The technological resources of the DIA and how they can best be marshaled against future information needs.
- The IR&DC's review of Intelligence Community technology programs (September 1982) and recommendations for enhancements. [redacted]

25X1

3. We hope that you can devote an hour to an hour and a half to meeting with the TSP. My point of contact on the staff is [redacted] PPS. His telephone is [redacted] (secure). If necessary, he can provide further clarification of the study to your staff. [redacted]
